

Data Analysis & Statistical Services

Consulting

I enjoy working as a statistical consultant and have had as clients individuals in the fields of education, psychology, sociology, marketing, management, and many other fields.

I have utilized a variety of statistical methods in my work as a consultant, including *t*-tests, ANOVAs, ANCOVAs, regression, and factor analysis. I have had experience with a much wider variety of statistical methods but try to adjust to the needs of my clients.

Dissertation and Thesis Consulting

I have assisted hundreds of graduate students over the years with their thesis or dissertation. Writing a thesis or dissertation can be a lengthy, time-consuming process. Typically I assist graduate students with the methodology and results portion of their study, but frequently assist in other areas as well.

Pricing

I have used an hourly rate for two reasons: first, it means that you do not overpay in case things go more quickly than anticipated, and secondly it means that I am not underpaid in case things take a little longer than what was originally planned.

However, my main goal is to work with you, so if you are in need of a flat rate for the entire project, we can definitely discuss options.

Free Consultation

If you are uncertain about the prospect of hiring a statistical consultant or what the cost might be, please feel free to send me an e-mail at dallen@behaviorfamily.com. I'd be happy to discuss your project in more details over the phone.
